Plant Ecology

An international journal

Contents of Volume 141

Special Issue : Clonal Plants and Environmental Heterogeneity – Space, Time and Scale
Guest Editors: Christopher Marshall and Elizabeth A.C. Price

Editorial
1

Clonal plants and environmental heterogeneity
E.A.C. Price & C. Marshall 3–7

CLO-PLA2 – a database of clonal plants in central Eruope
L. Klimeš & J. Klimešová 9–19

Clonal segmentation
C.P.D. Birch & M.J. Hutchings 21–31

Root sprouting in *Rumex acetosella* under different nutrient levels
L. Klimeš & J. Klimešová 33–39

Clonal splitting in desert shrubs
H.J. Schenk 41–52

Clonal plasticity in response to rhizome severing and heterogeneous resource supply in the rhizomatous grass *Psammochloa villosa* in an Inner Mongolian dune, China
M. Dong & B. Alaten 53–58

Are stoloniferous plants able to avoid neighbours in response to low R: FR ratios in reflected light?
L. Leeflang 59–65

Root response to above-ground light quality
S. Pecháčková 67–77

Compensatory growth of two clonal dwarf shrubs, *Arctostaphylos uva-ursi* and *Vaccinium uliginosum* in a heavy metal polluted environment
M. Salemaa, I. Vanha-Majamaa & P.J. Gardner 79–91

The effect of systemic rusts and smuts on clonal plants in natural systems
A. Wennström 93–97

Effects of clonal integration on plant plasticity in *Fragaria chiloensis*
P. Alpert 99–106

Spatial structure of stoloniferous herbs: an interplay between structural blue-print, ontogeny and phenotypic plasticity
H. Huber, S. Lukács & M.A. Watson 107–115

Modelling the morphological response to nutrient availability in the clonal plant *Trientalis europaea* L.
J. Piqueras, L. Klimeš & P. Redbo-Torstensson 117–127

Functional specialization of ramets in *Scirpus maritimus*
A. Charpentier & J.F. Stuefer 129–136

Asexual reproduction in a population of a leafy hepatic species *Lophozia silvicola* Buch in central Norway
S. Laaka-Lindberg 137–144

Genotypic structure in clonal *Rhododendron ferrugineum* L. (*Ericaceae*) populatons: origin and maintenance
A. Pornon & N. Escaravage 145–150

Reproductive biology and genetic structure in *Lloydia serotina*
B. Jones & C. Gliddon 151–161

The interplay of hybridization and clonal reproduction in the evolution of willows
J. Salick & E. Pfeffer 163–178

Optimal resource allocation to seeds and vegetative propagules under density-dependent regulation in *Syneilesis palmata* (Compositae)
S. Nishitani, T. Takada & N. Kachi 179–189

Two fitness measures for clonal plants and the importance of spatial aspects
E. Winkler & M. Fischer 191–199

Instructions to authors 201–204

Contents volume 141 / List of contributors 205–206
